AXÍA XL

SBR12N2TF Series

STAND-IN STACKERS
WITH TELESCOPIC FORKS

1.2 tonnes

BIGGER REACH EFFICIENT STACKING

AXiA stand-in stackers can help you optimise warehouse space efficiency. AXiA XL models with telescopic forks enable more flexible handling of long loads and work with double deep racking setups. Double deep racking stores four pallets between aisles, reducing storage cost per square meter by up to 17% and increasing pallet locations by 25–30%.

SPECIFICATIONS

SBR12N2TF

STAND-IN STACKERS WITH TELESCOPIC FORKS

1.2 tonnes

BRAKES

 High-efficiency regenerative braking This gives more effective control and reduces brake wear.

DRIVE

- Powerful AC drive motor
- High torque for greater efficiency. No carbon brushes mean lower servicing requirements.
- Intelligent Cornering System The truck senses the angle of a turn and reduces speed early for maximum stability and accurate, positive cornering.
- Automatic Speed Reduction Drive speed is automatically limited when forks are above 1.2m to allow higher capacities above that height.

ELECTRICAL AND CONTROL SYSTEMS

- Built-in Li-ion battery
 - Fast opportune charging removes the need for extra batteries and allows 24/7 operation. (Junior chassis only) (Option)
- Convenient charging
- An extra battery plug on the outside of the truck allows for easy charging without needing to disconnect the internal battery plug. (Lead acid batteries) (Option)
- Combi controller lift system Fingertip control for speed regulated lifting and proportional valve for lowering.
- **Enhanced Stability System (ESS)** 4-point chassis for maximum stability. drive speed is reduced when forks are lifted, and acceleration is reduced when steering angle exceeds 45 degrees.

FORKS AND MAST

- Level Assistance System
 - Automatically detects the operator's intention and automatically stops when the forks are at precisely at the right level. (Option)
- Laser positioning guide
- Aligning the red laser line with the centre of the pallet pocket allows the driver to quickly ensure the forks are in the desired position. (Option)
- Robust, clear view mast Optimised design means excellent visibility of the forks and load.
- Exceptionally smooth 'no knock' transition between mast stages Vulkollan dampers ensure quieter movement over the lift range.
- Smooth landing of the fork carriage Hydraulic attenuation in the free-lift cylinder makes this much quieter.
- Hydraulic telescopic forks Speed regulated for greater precision and safer operation.
- Longer reach
- Telescopic forks also allow handling of longer goods and greater reach across lorry beds.
- Wide Straddle Legs
 - These feature single wheels as standard with tandem wheels as an option. 750mm width standard, 950mm option.

FRAME AND BODY

- Robust chassis
 - Built for intensive operations, with great inherent strength and high residual capacities. Designed to enclose the operator within for extra safetv.
- Strong battery lock
 - Simple and safe. Battery lock can only be unlocked when battery plug is disconnected. Battery plug can only be reconnected if battery is locked.
- Excellent ground clearance
- Easy and safe handling on loading docks and ramps.
- RapidAccess features
- These allow quick and easy entry to all areas for checks and maintenance.
- Waterproof wiring and connectors
- Sealed compartment prevents system failure and corrosion from water and
- Overhead guard pillars
 - Protection for the operator while still offering excellent visibility.

STAND-IN STACKERS WITH TELESCOPIC FORKS

1.2 tonnes

HYDRAULICS

Smooth, quick lifting and lowering High levels of control and productivity. Low noise means less fatigue for the operator over long shifts.

OPERATOR COMPARTMENT AND CONTROLS

- Optical Presence Sensor
- This locks all movement of the truck and its mast if the operator is not present. Driver can lift foot slightly without brakes automatically engaging, reducing muscle stress.
- Plenty of storage space Storage for on-board essentials, putting clipboard, mobile phone, drinks bottle and pen all within easy reach.
- Ultra-low step height Operators stay more productive throughout shifts thanks to easy on/ off access.
- **Ergo Forks Trailing Control** When working with forks trailing, an additional speed control allows an operator to stand in a more comfortable and ergonomic forwardfacing position while travelling. (Option)

STEERING SYSTEM

- Fully adjustable steering wheel Height and distance are ergonomically adjustable to reduce strain and lower risk of RSI.
- 360-degree steering

The operator can keep the truck in constant motion - saving seconds on every turn. (Option)

Dynamic Power Steering Smooth, precise control with minimum effort offering maximum comfort and stability at top speed.

AXÍA XL **AVAILABLE LI-ION SYSTEMS**

MAKE YOUR FORKLIFT GO EVEN FURTHER

Tried, tested and proven in the field. lead-acid batteries have been the long-standing choice for companies employing electric lift trucks. However, with long charging times, demanding maintenance requirements, the need for extra batteries, and high risk of operator misuse, day-to-day use can be a challenge.

Fortunately, there's a new battery system on the block: Li-ion from Mitsubishi Forklift Trucks.

Designed to meet your business' demands — including multi-shift (24/7) operations — without the need for spare batteries, our high-performance Li-ion battery system is up to 30% more efficient than lead-acid counterparts. Plus, it's virtually error-proof, thanks to its ultra-low-maintenance design which prevents cell damage.

 Gas-emission free No need for air ventilation.

Exceptional high battery and charger efficiency

State-of-the-art technology delivers up to 30% more power efficiency than lead-acid batteries.

Maintenance-free design

No need for daily checks and water re-fills. This reduces the risk of operators damaging cells and reducing their lifetime. Needs a full charge each week to activate cell balancing.

No need for spare batteries or charging room

You can save both space and costs in multi-shift applications, maximising profitability.

Quick charge capabilities

Just 15 minutes is all your battery needs to keep your truck going for a few more hours. It only takes 1 to 2 hours to fully charge a completely discharged battery.

Higher sustained voltage

This gives more consistent lifting and driving performance — particularly noticeable towards the end of a shift.

Multiple safety features

This includes circuit protection, deepdischarge and overcharge protection. and individual cell temperature and voltage monitoring.

On-the-go performance and monitoring

The system's integrated monitoring system has an easy-to-read display unit.

Wide choice of battery and charger capacities

The most suitable power supply can be matched to the exact requirements of a specific application.

Clean Li-ion batteries are ideal for sensitive environments such as those in the food or packaging industries.

Fully integrated Li-ion battery

Features a sophisticated CANbus communication and an automatic ON/OFF synchronization between battery and truck. Battery level, notifications and alarms are integrated into the truck display, to secure clear and easy overview for the truck operator.

All dimensional values, weights and measures vary according to configuration

- 1) 4-point design with twin assembly drive side castor wheels 2) When Senior (BC775) chassis then add 104 mm
- 3) Telescopic forks reach travel, optional reach 450-1000
- 4) Standard motor, not sufficiently tested with the 8.0 kW heavy-duty option yet
- 5) With heavy-duty lift motor, standard is 4.0 6) With Senior chassis, 24V / 560-775Ah and 460-610 kg
- 7) This is a reference test value that varies according to model, config and usage pattern 8) There are two standard straddle/support legs widths available to choose from (ref. b1/b4)

STANDARD EQUIPMENT & OPTIONS

^{*} Li-ion battery option is available in selected regions.

STAND-IN STACKER **WITH TELESCOPIC FORKS**

1.2 tonnes

Standard display

Storage compartment under armrest

Foldable seat

^{**} Li-ion battery option not in combination with cold store design, 0°C to -30°C.

WHEN RELIABILITY IS EVERYTHING...

THE ALL ROUNDER

With a name that reflects its manoeuvrability, AXiA combines awardwinning ergonomics with high performance and low-maintenance features to deliver a complete warehouse support package.

Efficient, versatile and durable, AXiA is the perfect choice for every workplace.

name, our materials handling equipment benefits from the tremendous heritage, huge resources and cutting-edge technology of one of the world's largest corporations – Mitsubishi Heavy Industries Group.

Like any product bearing the Mitsubishi Forklift Trucks

Engineering spacecraft, jet planes, power plants and more, MHI specialises in those technologies where performance, dependability and superiority decide your success or failure...

So when we promise you quality, reliability and value for money, you know it's a guarantee we have the power to deliver.

That's why every model in our award winning and comprehensive range of lift trucks and warehouse equipment is built to a high specification – to ensure it keeps working for you. Day after day. Year after year. Whatever the job. Whatever the conditions.

YOU'LL NEVER WORK ALONE

As your local authorised distributor, we are here to keep your trucks working – through our extensive experience, our technical excellence and our commitment to customer care.

We are your local experts, backed by efficient channels to the entire organisation of Mitsubishi Forklift Trucks.

No matter where you are, we are close by – with the capability to meet your needs.

Discover how Mitsubishi Forklift Trucks give you more from your local authorised distributor or when you visit our website www.mitforklift.com

Performance specifications may vary depending on standard manufacturing tolerances, vehicle condition, types of tyres, floor or surface conditions, applications or operating environment. Trucks may be shown with non-standard options.

Specific performance requirements and locally available configurations should be discussed with your distributor.

We follow a policy of continual product improvement. For this reason, some materials, options and specifications could change without notice.

QUALITY | RELIABILITY | VALUE FOR MONEY
